## Senior Software Engineer

---

Be part of an energetic, agile development team that is creating exciting enterprise applications for the business world and get your chance to work on a wide array of different technologies ranging from Windows client applications, web services, SQL databases, and then some! The development processes we abide by are geared to create nothing but the best software which meets the needs of customers. As developers, we are provided with great tools, triple 20" LCD's and killer machines to help facilitate our creative tendencies.

EWS Group, LLC is a growing and profitable company that creates enterprise software solutions for the moving and storage industry.

### Description

The Senior Software Engineer works closely with the Lead Engineer and the Product Manager, and is responsible for the design and programming of multiple systems.

### Responsibilities

- Architect, program, and debug high quality products with efficient and reusable code
- Design, develop and extend enterprise windows client, back-end database, web services and other peripheral applications
- Be passionate about good software practices

### Qualifications

- At least 5 years of experience in C# programming in a Windows environment
- At least 2 years of experience in WPF development technology
- Experience designing/implementing complex data driven applications
- Experience with T-SQL programming
- Excellent object-oriented design and analysis skills
- Stellar communication skills

### Preferences

- Experience in Agile development philosophies (extreme programming, scrum, etc.)
- Microsoft SQL 2005/2008 database programming experience
- C++ programming experience

### Education and/or Experience

Bachelor's Degree (B.S.), or M.S. in Computer Science, Engineering or a related degree
