

FOR IMMEDIATE RELEASE

## Efficient Workflow Solutions acquires assets of TTI

GRAND JUNCTION, COLORADO -- April 1, 2007-- Jim Saad, President of Efficient Workflow Solutions, LLC (dba Mover's Suite Software) has announced that the company has acquired the assets of Transportation Technologies, Inc., a Pennsylvania-based company specializing in providing information management systems to the moving & storage and trucking industries.

According to John Stockton, President of Transportation Technologies, the company had been seeking ways to grow their business while continuing to deliver the high level of service that their customers have come to expect. "Our employees are second to none in serving our customers and Efficient Workflow Solutions shares that strong commitment," said Mr. Stockton. "With the resources of Efficient Workflow Solutions complementing what TTI already does so well, I am confident that our current customers will be well served by this consolidation of companies."

Mr. Saad said, "I am excited about the opportunity to serve TTI's customers. Their reputation of excellence in customer service is one I am committed to continue. By combining the strengths of both organizations we can be more effective and more efficient in providing product support to the TTI customer base."

He further explained that "Serving the information management systems needs of the moving & storage and freight hauling market is extremely challenging in the economic environment of today's transportation business. This consolidation of two industry leaders will enable us to serve all of our customers well by leveraging our talented group of experienced employees while achieving more efficient economies of scale."

Founded in Grand Junction, Colorado in 2001, Efficient Workflow Solutions, LLC provides business management consulting and software systems designed specifically for the moving industry with their Mover's Suite Software product. Their primary focus is to improve administrative and operational efficiencies and provide management with accurate financial reporting and analysis.
